

SOIL MIXER

TECHICAL DETAILS

Capacity
1 m³ / 5 min

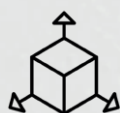

Voltage
380 V

Frequency
50 Hz

Power
5,9 kW

Dimensions
Width: 260 cm
Length: 275 cm
Height: 160 cm

Weight
820 kg

TECHNICAL SPECIFICATIONS

- It is an ideal machine for preparing tray and potting mortar.
- It does not damage fragile materials such as perlite, as its mixers are spiral-shaped shafts.
- It is used in the mixture of products such as peat, perlite, fertilizer, cocopeat, slag, pumice, soil.
- It prepares and moistens your tray and potting mortar homogeneously in a short time like 3-5 minutes. (You can adjust the humidification amount with the valve.)
- You can empty the mixture out with the tape and use it.
- It can be made as 2m³ hopper. (optional)
